By 조정식

1번부터 17번까지는 듣고 답하는 문제입니다. 1번부터 15번까지는 한 번만 들려주고, 16번부터 17번까지는 두 번 들려줍니다. 방송을 잘 듣고 답을 하시기 바랍니다.

1. 다음을 듣고, 여자가 하는 말의 목적으로 가장 적절한 것을 고르시오.

- ① 도서관 회원 가입 방법을 소개하려고
- ② 독서 프로그램 및 행사 참여를 독려하려고
- ③ 도서 연체 시 이용 제한 규정을 설명하려고
- ④ 도서관 리모델링 공사 세부 일정을 안내하려고
- ⑤ 공사기간 중 도서 대출 기한 연장을 공지하려고

2. 대화를 듣고, 남자의 의견으로 가장 적절한 것을 고르시오.

- ① 디지털 기기에 비밀번호를 저장해서는 안 된다.
- ② 잦은 비밀번호 변경이 보안에 안 좋을 수 있다.
- ③ 보안을 위해 사이트별로 비밀번호가 달라야 한다.
- ④ 같은 비밀번호를 오래 사용하면 해킹 위험이 있다.
- ⑤ 기억하기 쉬운 비밀번호가 관리에 더 효율적이다.

3. 다음을 듣고, 남자가 하는 말의 요지로 가장 적절한 것을 고르시오.

- ① 예상 질문을 작성하여 미리 면접 연습을 하는 것이 좋다.
- ② 면접에서 자신의 강점은 강조해서 말하는 것이 필요하다.
- ③ 질문의 의도를 잘 이해하고 대답하는 것이 면접에서 중요하다.
- ④ 면접에서 면접관에게 질문하는 것은 좋은 인상을 주지 않는다.
- ⑤ 면접하기 전에 취업할 회사의 업무를 파악하는 것이 필요하다.

4. 대화를 듣고, 그림에서 대화의 내용과 일치하지 않는 것을 고르시오.

5. 대화를 듣고, 남자가 할 일로 가장 적절한 것을 고르시오.

- ① 연회장 예약하기
- ② 초대장 보내기
- ③ 밴드 섭외하기
- ④ 연회장 장식하기
- ⑤ 축하 현수막 주문하기

6. 대화를 듣고, 여자가 지불할 금액을 고르시오. [3점]

- ① \$180
- ② \$220
- ③ \$240
- ④ \$310
- ⑤ \$360

7. 대화를 듣고, 남자가 Sunrise Swim Club에 참여할 수 없는 이유를 고르시오.

- ① 물에 대한 공포가 심해서
- ② 오전에 회의가 자주 있어서
- ③ 피부 알레르기가 있어서
- ④ 아침 일찍 일어나는 게 어려워서
- ⑤ 다른 운동을 하고 있어서

8. 대화를 듣고, OTT 서비스인 Vivaflix에 관해 언급되지 않은 것을 고르시오.

- ① 회원권 종류
- ② 월 요금
- ③ 동시 시청 가능 인원수
- ④ 다운로드 여부
- ⑤ 무료 체험 기간

9. San Francisco Walking Tour에 관한 다음 내용을 듣고, 일치하지 않는 것을 고르시오.

- ① 60분 동안 진행된다.
- ② 정원은 최대 20명이다.
- ③ 앱으로 예약 시 추가 할인이 있다.
- ④ 당일 신청도 가능하다.
- ⑤ 비가 와도 진행된다.

10. 다음 표를 보면서 대화를 듣고, 여자가 주문할 케이크를 고르시오.

The Cake Boutique

	Model	Size (inches)	Flavor	Shape	Decoration
①	A	8	Red Velvet	round	flower
②	B	8	Lemon	rectangle	fresh fruit
③	C	10	Strawberry	square	fresh fruit
④	D	12	Chocolate	heart-shaped	flower
⑤	E	8	Vanilla	round	fresh fruit

11. 대화를 듣고, 남자의 마지막 말에 대한 여자의 응답으로 가장 적절한 것을 고르시오. [3점]

- ① What a relief! I was so worried about the flight.
- ② Wow! I didn't expect him to come back so soon.
- ③ Too bad! I can't believe all the flights were delayed.
- ④ Good to hear! Your son must be happy to be home.
- ⑤ Great news! I can still fly out this afternoon as planned.

12. 대화를 듣고, 여자의 마지막 말에 대한 남자의 응답으로 가장 적절한 것을 고르시오.

- ① Don't worry! There are plenty of parking spaces.
- ② Of course! You can take the elevator over there.
- ③ Sorry! This elevator only goes up to the 9th floor.
- ④ Definitely! You can park in the customer parking lot.
- ⑤ I'm not sure! Try using the map app on your phone.

13. 대화를 듣고, 남자의 마지막 말에 대한 여자의 응답으로 가장 적절한 것을 고르시오.

Woman: _____

- ① Thank you! I think you'd make an amazing trainer.
- ② That's true. A light stretch is a must before running.
- ③ Awesome! I admire how you set goals and work hard.
- ④ Sounds good! I guess I should start running tomorrow.
- ⑤ I'd love to! Thanks for inviting me to your running club.

14. 대화를 듣고, 여자의 마지막 말에 대한 남자의 응답으로 가장 적절한 것을 고르시오. [3점]

Man: _____

- ① Oh no. Your insurance seems too expensive.
- ② That's right. Accident insurance is essential.
- ③ Got it. I feel so relieved to have this insurance.
- ④ Good to hear. I was worried I might need surgery.
- ⑤ Please hurry. I haven't received the documents yet.

15. 다음 상황 설명을 듣고, Harper가 학생에게 할 말로 가장 적절한 것을 고르시오.

Harper: _____

- ① I'm sorry, but this concert has an age restriction.
- ② The restroom is over there, so please hurry back.
- ③ If you leave, you won't be able to re-enter the hall.
- ④ Sure, but you'll need to show your ticket to re-enter.
- ⑤ Please remain quiet, or you may need to leave the hall.

[16~17] 다음을 듣고, 물음에 답하십시오.

16. 남자가 하는 말의 주제로 가장 적절한 것은?

- ① advantages and disadvantages of global warming
- ② the role of melting glaciers in preserving ocean life
- ③ various strategies to reduce the effects of global warming
- ④ possible effects of glacier melting caused by global warming
- ⑤ approaches to prevent melting glaciers and rising sea levels

17. 언급된 나라가 안닌 것은?

- ① Bangladesh ② Canada ③ Norway
- ④ Russia ⑤ Sweden

이제 듣기 문제가 끝났습니다. 18번부터는 문제지의 지시에 따라 답을 하시기 바랍니다.

18. 다음 글의 목적으로 가장 적절한 것은?

Dear Valued Visitors,

My name is Alex Morgan, and I'm the operations manager at Eco Valley Zoo. In order to check the health of our wild animals during the summer and provide safer and more comfortable exhibit spaces, we would like to inform you that our zoo will be temporarily closed for one week starting August 1st. During this period, our zookeepers and staff will closely monitor the animals' health and work on improving the viewing areas and visitor amenities. We kindly ask for your understanding, as this is for the safety of both our animals and visitors. Thank you for your cooperation.

Sincerely,
Alex Morgan

- ① 동물원 입장료 변경을 공지하려고
- ② 야생동물 보호 프로그램을 홍보하려고
- ③ 동물원의 안전 관리 직원을 모집하려고
- ④ 동물원의 일시적 운영 중단을 안내하려고
- ⑤ 동물원 내 새로운 관람 시설을 소개하려고

19. 다음 글에 드러난 Kate의 심경 변화로 가장 적절한 것은?

Kate arrived at the train station early to catch the train to meet a friend she hadn't seen in a long time, but she had been waiting for the train for over an hour. She paced nervously and kept checking her phone to see if there was any update on the train's status. "What if I miss my appointment?" she thought, biting her fingernails while frequently glancing at her watch. Just as she was about to give up and leave, the train staff's voice rang out from the speaker. "Train 203 has just arrived at platform 2." Kate felt her heart lighten immediately. She smiled as she quickly picked up her bags and ran to the platform, feeling at ease as she boarded the train.

- ① calm → delighted ② anxious → relieved
- ③ bored → satisfied ④ joyful → lonely
- ⑤ discouraged → indifferent

20. 다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

Homo sapiens has now come to replace Nature as the dominant environmental force on Earth. Our building of cities and roads, damming of rivers, and industrial and mining activity are having a profound and lasting effect, remoulding the landscape, changing the global climate and causing widespread extinctions. Scientists have proposed that a new geological epoch should be named to recognise this dominance of our influence over natural processes on the planet — the Anthropocene, the 'recent age of humanity'. But as a species we are still inextricably linked to our planet, and the Earth's history is imprinted in our make-up, just as much as our activities have left their distinct marks on the natural world. To truly understand our own story we must examine the biography of the Earth itself — its landscape features and underlying fabric, atmospheric circulation and climate regions, plate tectonics and ancient episodes of climate change.

*epoch: 시대, 시기 **inextricably: 불가분하게

- ① 인류는 스스로를 이해하기 위해 지구의 역사를 살펴보아야 한다.
- ② 자연을 효율적으로 통제하려면 인간의 개입을 확대해야 한다.
- ③ 인류의 진화 과정은 기술 발전의 관점에서 이해되어야 한다.
- ④ 지속 가능한 발전을 위해 지구 구조에 대해 파악해야 한다.
- ⑤ 지구의 환경 변화를 연구하려면 문명 발전에 집중해야 한다.

21. 밑줄 친 hide and seek이 다음 글에서 의미하는 바로 가장 적절한 것은?

Let's imagine a medical setting in London. A person recovering from cosmetic surgery is presented with a mirror. The moment is thrilling. The gaze that meets the glass is one of agony — are the signs of time gone? It is really hard to tell. Certainly though, the face in the mirror seems different than before. And, with equal certainty, we can assume that for the surgery to be deemed successful the face in the mirror should appear smoother, the pain should have been minimal and evidence of the surgery (marks, scars and stitches) should be close to invisible. To smile at one's mirrored reflection there should be no obvious marks and no memory of procedure: no patient should have any recollection of how it felt like when the surgical knife cut into the skin. There is nothing for the resulting face to communicate. The face lift is to be kept a secret. Quietly, secretively, the stitched-up skin should imitate that of a younger person. The collaborative story of event, body and mirror is, therefore, one of pretence: of hide and seek.

*agony: 고통

- ① looking for ways to make oneself look younger
- ② recovering quickly from the pain of the surgery
- ③ trying to hide the experiences prior to the surgery
- ④ embracing an unfortunate situation with a positive mindset
- ⑤ concealing any evidence or signs related to the surgery

22. 다음 글의 요지로 가장 적절한 것은?

Your ability to remember begins with your desire to remember. If someone is talking and you are not interested in listening to them, you are unlikely to remember what they are saying — whether they are a colleague introducing themselves or a professor at the podium. So, if you want to remember what someone is saying later, it is important to keep in mind the goals that motivate you to remember what they are saying. This colleague could be a wonderful collaborator on a future project — and you don't want to embarrass yourself to forget their name at the next meeting. And, yes, what the professor is saying may be important not only so you can pass the test but for your later career as well. This principle of motivation is a key to all forms of intentional memory. For example, if you want to be able to find your car after the concert, you should be motivated to pay attention to where it is as you are walking away from it in the parking lot.

*podium: 연단

- ① 기억력은 상호 협력과 공동 연구에 중요한 요소이다.
- ② 기억 욕구가 너무 강하면 내용이 왜곡될 위험이 있다.
- ③ 기억력을 증진하는 데는 사회적 상호 작용이 필수적이다.
- ④ 무언가를 기억하는 데는 기억하려는 동기 부여가 중요하다.
- ⑤ 대화 내용을 잘 기억하려면 화자의 동기를 파악할 필요가 있다.

23. 다음 글의 주제로 가장 적절한 것은?

It isn't surprising that fiction writers have reservations about one of their works being discussed during one evening by a heterogeneous group that won't revisit that particular book. And of course no monthly two-hour session can deal with the many formal and structural aspects of a book or the reading process involved; discussion tends to focus on the plot, characters, and appeal of the subject matter. Besides, by randomly selecting books, there's little chance for members to make meaningful connections between writers and works, and to understand the complexities of literary culture. A more serious objection, to my mind, is the fact that most book clubs are personal invitation-only, so will tend to select birds of a feather without reaching for very different people who might disrupt or challenge existing members. This is what school and college classes, open groups in libraries, and adult education have always done. Their decline threatens to weaken publishers' and writers' potential to reach wider and more diverse audiences, and stimulate healthy debate about the process of writing.

*reservation: 의구심 **heterogeneous: 이질적인

- ① limitations of most book clubs
- ② proper management for book clubs
- ③ how to lead a book club discussion
- ④ the pros and cons of various book clubs
- ⑤ effects of book clubs on reading attitudes

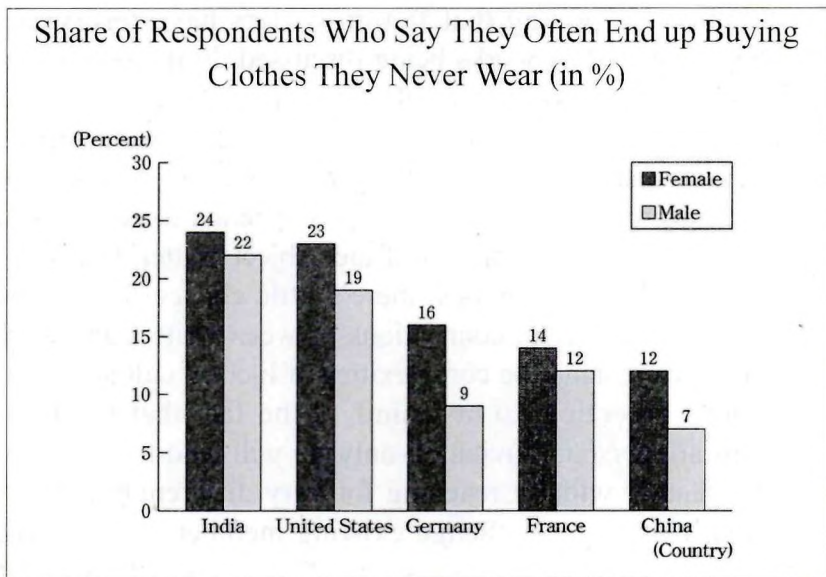

24. 다음 글의 제목으로 가장 적절한 것은? [3점]

Understanding phenomena as a system means understanding the context and the relationships involved. It shows that it is not only useless, but also meaningless to try and understand the whole by breaking it down into parts. Putting an organization into context means understanding and managing it as a whole in relation to its suppliers and customers and all its stakeholders. An organization is intrinsically a system and it cannot be controlled better by dissecting it up into separate parts. An organization, therefore, needs to be understood in terms of the interdependencies that exist, internally and externally. Furthermore, a systems understanding of organizations teaches us that at every level of complexity there are "emergent properties." This means properties that do not exist within separate parts but that emerge within the system as a whole, from the interactions and interdependencies in the system. It is the pattern of relationships and interactions in an organization that defines its essence.

*stakeholder: 이해 당사자

- ① Grasp the Complexity of an Organization by Analysis
- ② The Essence of an Organization as a Fixed Characteristic
- ③ Interactions Within a System: From Complexity to Simplicity
- ④ An Organization as a System: More Than the Sum of Its Parts
- ⑤ Efficiency of a System Depends on the Autonomy of Each Part

25. 다음 도표의 내용과 일치하지 않는 것은?

The graph above shows the share of respondents who say they often end up buying clothes they never wear according to their gender group in five countries. ① Among the countries shown in the graph, India had the largest share of males who said they often end up buying clothes they never wear, which was 22%. ② The share of females who often ended up buying clothes they never wear was smaller in China than in Germany. ③ The gap between the share of females and that of males who often ended up buying clothes they never wear was larger in the United States than in India. ④ The percentage of males who often ended up buying clothes they never wear in France was 12%, which was smaller than that in the United States. ⑤ As for China, the share of respondents who often ended up buying clothes they never wear was the smallest among the countries shown in the graph for each gender, being under 10%, respectively.

26. Otto Dix에 관한 다음 글의 내용과 일치하지 않는 것은?

Otto Dix, one of the most important painters in Germany, was born in Untermhaus, Germany. He was exposed to art from an early age. Otto spent time in his cousin's studio, which influenced his decision to become an artist. He entered the Academy of Fine Arts in Dresden in 1910, focusing on landscapes and portraits in his early work. During World War I, he was wounded in the neck while serving. His war experiences deeply affected him, and Otto later expressed them in his art. Afterwards, his style became more expressionist, and he co-founded the Dresden Secession group. His most famous work is *Sailor and Girl*, which was also used as the cover for a novel by Philip Roth. In 1968, he received the Rembrandt Prize from the Goethe Foundation and died the following year of a stroke. His house was opened as a museum and art gallery in 1991.

- ① 어린 시절부터 미술을 접했다.
- ② 1910년에 Academy of Fine Arts in Dresden에 입학했다.
- ③ 전쟁에 대한 경험을 예술로 표현했다.
- ④ *Sailor and Girl*이 소설의 표지로 사용되었다.
- ⑤ 사망 후 Rembrandt Prize를 수상하였다.

27. Korean History Program for Kids에 관한 다음 안내문의 내용과 일치하지 않는 것은?

Korean History Program for Kids

Are your kids curious about Korea's history? Join us for the Korean History Program for Kids, offered by the National Museum of Korea.

Date & Time: August 15th, 11 a.m. – 2 p.m.

Program Includes:

- 1) Trying on hanbok, Korea's traditional clothing
- 2) Making folding fans inspired by historical designs
- 3) Playing traditional Korean games once enjoyed by children

Registration & Cost

- Register online only at www.khistoryforkids.com
- \$25 per person (lunch included)

Notes

- This program is only for children aged 12 and under.
- Parents or guardians should stay on-site during the activities.
- ※ Limited to 20 participants — register early to secure your spot!

- ① 3시간 동안 진행된다.
- ② 한국의 전통 의상을 입어본다.
- ③ 현장에서 등록할 수 있다.
- ④ 12세 이하만 대상으로 한다.
- ⑤ 참가 인원이 20명으로 제한된다.

28. 2026 Fairfield Cooking Contest에 관한 다음 안내문의 내용과 일치하는 것은?

2026 Fairfield Cooking Contest

Show off your cooking skills at the 2026 Fairfield Cooking Contest. Everyone is welcome to join and share delicious dishes.

When & Where

- Saturday, March 18th, from 10 a.m. to 2 p.m.
- Fairfield Community Hall

Guidelines

- Participants must prepare a full-course meal including an appetizer, main dish, and dessert.
- All dishes should be completed within 3 hours to be judged.
- Ingredients are provided, but participants must bring their own cooking tools.

Registration

- Register online at www.fairfieldcooking.com by March 1st.

Additional Information

- Winners will be chosen by local residents.
- Entries will be photographed for future event promotion.
- Leftover food can be taken home in personal containers.

- ① 일요일 오전에 시작된다.
- ② 조리 도구가 제공된다.
- ③ 3월 18일까지 등록해야 한다.
- ④ 수상자는 지역 주민들이 선정한다.
- ⑤ 남은 음식을 집에 가져갈 수 없다.

29. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

How convenient it is to forget that technology has served not only to harm the environment but also ① to improve it. The Neolithic Revolution, which produced the most harmonious period between nature and post-Paleolithic humanity, was above all a technological revolution. It was this period ② that brought to humanity the arts of agriculture, weaving, pottery, the domestication of animals, the discovery of the wheel, and many other key advances. True, there are techniques and technological attitudes that ③ are entirely destructive of the balance between humanity and nature. Our responsibilities are to separate the promise of technology — its creative potential — from the capacity of technology to destroy. Indeed, there is no such word as “Technology” that governs all social conditions and relations; there are different technologies and attitudes toward technology, some of ④ them are indispensable to restoring the balance, others of which have contributed profoundly to its destruction. What humanity needs is not a wholesale discarding of advanced technologies, but a careful selection, indeed a further development of technology along ecological principles that will ⑤ contribute to a new harmonization of society and the natural world.

*Neolithic: 신석기 시대의 **Paleolithic: 구석기 시대의

30. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은? [3점]

It is naive to think that humans naturally understand one another’s experiences. If you have never gone hungry, you will find it hard to imagine what it is like to live without reliable access to food. And if you are part of a dominant majority group, you may be oblivious to what it is like to ① fear that others will treat you with derision or hostility because of the color of your skin. Advocates of the challenger ideology are right to say that there are serious ② barriers to mutual understanding in a diverse democracy — and that many of their countrymen are naive about the difficulties this raises. But though a member of one group may never be able to perceive the world in exactly the same way as a member of another group, it is a ③ relief to give up on the promise of effective communication. A man need not have experienced sexual harassment to recognize its ④ injustice. Nor does someone who is white need to have “lived experience” with racism to recognize how vile it is. This is why, far from giving up on the idea of mutual understanding, diverse democracies should double down on ⑤ inspiring empathy.

*oblivious: 안중에 없는 **derision: 조롱 ***vile: 비열한

[31~34] 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

31. _____ influences the motivational climate of the classroom because it prompts students’ adoption of achievement goals. As an example, if a teacher tracks students’ math or reading skills on a classroom sticker board and the students with the highest achievement are rewarded, students may discern that outperforming others and showing ability matter. Similarly, if a teacher shares the distribution of exam grades, students will be more likely to set goals related to performance, which may cause some students to work hard but may also lead to problematic outcomes such as academic dishonesty, unwillingness to seek or give help, or self-handicapping behaviors such as procrastination. In an environment where students receive individualized feedback, have a chance to re-do their work, and are praised for thinking and trying, students may begin to understand that success is about learning. They may then adopt a mastery goal orientation that leads them to engage in class and put forth effort to improve their understanding and skills.

*procrastination: 미루기

- ① Evaluation
- ② Empathy
- ③ Competition
- ④ Superiority
- ⑤ Imitation

32. Even if it amounts only to adding salt, food seasoning of some sort is practised in all cultures. This appears to be primarily driven by a desire to improve food flavour, rather than any practical reason such as food preservation. Some salt intake is physiologically necessary, and it was once used as a preservative, but this does not account for the fact that a majority of cultures use far more than is required to maintain health. In fact, most of us like to consume about twice as much salt as we need, elevating this common substance to the world’s number one food additive. Interestingly, salt preference in nonhuman animals is also known. One well-known instance involves macaque monkeys living on the Japanese island of Koshima. A particular monkey troop learned, largely by watching one of their members, that washing their favoured sweet potatoes in seawater rather than fresh water was preferable. That the macaques repeatedly washed the sweet potatoes between bites led to the conclusion that _____.

*macaque monkey: 짧은 꼬리 원숭이

- ① the cleanliness of food outweighs its flavouring
- ② the added salt was used to improve the flavour
- ③ the salt magic led to the change of their taste preference
- ④ healthy eating habits are not exclusive to humans
- ⑤ the salt in seawater served as a food preservative

33. There are good reasons to think that the march of financial automation has only just begun. The reality is that finance, and particularly financial trading, is an area of economic activity in which automation is not just possible but essential. The markets are the natural habitats of the machine. They are electronically mediated. They are highly liquid and dynamic: there are lots of activities taking place over short timescales. The core business model of finance requires traders to spot arbitrage opportunities (price differentials between functionally equivalent assets on different markets) before their competitors do. The arbitrage opportunities can be precisely defined in mathematical and formal terms — the native language of the machine — and it can be difficult for humans to spot and calculate them in real time. They need machine assistance. As Wellman and Rajan point out, markets generate huge volumes of data at high velocity, which require algorithms to digest and assess. The dynamism of markets means that timely response to information is critical, providing a strong incentive to _____ . [3점]

*arbitrage: 차익거래

- ① take slow humans out of the decision loop
- ② emphasize human intuition over automation
- ③ favor quick intuition over careful deliberation
- ④ encourage collaboration among human traders
- ⑤ promote equal opportunities in market dynamics

34. If you are having trouble accepting the fact that much of your experience of the world is a distortion, conduct a brief thought experiment. Think of a time you saw a huge sun setting on the horizon, or observed a giant yellow moon creeping in your window. Now consider the facts. Has the size of the sun or the moon actually varied from one moment of the day to the next? No; your perceptual system has automatically distorted the image. Try another exercise to illustrate to yourself that your perceptual system is constantly manipulating the information it receives to provide for you a coherent and constant perception of objects. Imagine that you are at a town hall meeting held by a nominee for President. When you observe the nominee walking around the room, first he/she is 10 yards away from you, then 5. The pure image on the retina informs you that as the person approaches, the individual grows in size. But you do not perceive an emerging giant. Although the physical object remains constant, the stimulation that strikes the sensory apparatus varies. Yet your experience _____ . [3점]

*retina: 망막 **apparatus: 기관, 기구

- ① reflects the past images of the object
- ② agrees with the constancy of the object
- ③ traps the object within your imagination
- ④ helps distort the properties of the object
- ⑤ depends on the measurement of the object

35. 다음 글에서 전체 흐름과 관계 없는 문장은?

Testing children's abilities presupposes one condition which is particularly difficult to fulfill: the influence of experience must be lowered to a minimum. ① The test must be solvable for the gifted child and must make a gifted professional ponder a bit before resolving it (brilliantly); but at the same time the test must not be something that an ungifted professional, however experienced, can ever solve. ② It is a test with a certain secret — one based not on knowledge or the skills wrought of training but on intuition, on the instantaneous recognition of a truth. ③ Talent is the result of qualified training by a teacher or mentor and depends to a decisive degree on the support of a family (or the lack of it) during the early stages of its development. ④ This is something only the genuinely talented process. ⑤ In age-indifferent testing for special abilities, experience does not lead to success, and the absence of experience does not hinder the outstanding resolution of the problem.

*wrought: 만들어진

[36~37] 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

36.

It is tempting to assume that the promises and perils of now-emerging intelligence technologies and industries can be clearly distinguished, and to conclude that courses of action enabling us to avoid the latter and happily realize the former can be readily identified in advance.

- (A) The rise of autonomous vehicles will lower risks of traffic accidents and reduce insurance burdens. But, in doing so, it will also curtail the employment of heavy equipment operators and truck and taxi drivers.
- (B) Unfortunately, there is no factual warrant for this assumption. On the contrary, the greatest perils of intelligent technology do not appear to be extrinsic to its great promises but rather intrinsic to them.
- (C) Virtual personal assistants, in the same vein, will provide smart services drawing on knowledge resources far greater and far more quickly than any human ever could, but will at the same time subject their users to profit-generating surveillance and contribute to the atrophy of an increasingly wide range of intelligent human practices.

*peril 위험 **atrophy: 위축

- ① (A) - (C) - (B)
- ② (B) - (A) - (C)
- ③ (B) - (C) - (A)
- ④ (C) - (A) - (B)
- ⑤ (C) - (B) - (A)

37.

At least since the classical era, the idea that human beings are double has enjoyed very wide currency. According to this idea, each of us is divisible into two: an exterior being that all can see, and an interior being that lies hidden.

- (A) Centuries-old observation taught us that we have readable countenances, like open books. We can discern, by examination of the exterior changes, what is happening to the inner being. But this is true in a limited way, and of the momentary emotions only, which appear one moment and disappear the next.
- (B) Of the others we see the surface only; we know not what is going on in the realm of consciousness. The psychic agitations of our fellows — whether minor stirrings or severe, convulsive confusion — are generally undetectable to us. Similarly, our own inner disturbances are concealed to outsiders.
- (C) Still, the hidden inside and the visible outside are not wholly divorced from each other; some communication exists between the two. The proof is that some movements of the inside do reach the outside and show through, primarily in the face. [3점]

*countenances: 얼굴 표정 **agitation: 동요

- ① (A) - (C) - (B) ② (B) - (A) - (C)
 ③ (B) - (C) - (A) ④ (C) - (A) - (B)
 ⑤ (C) - (B) - (A)

[38~39] 글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳을 고르시오.

38.

During speech, however, we cut down the time for inhaling to as little as a quarter of a second, and we regularly extend the time for exhaling to 5 or 10 seconds or more, depending on our voice control, emotional state, and other such factors.

The sequence of events involved when we breathe in and out is known as the *respiratory cycle*. (①) Normally, the two halves of this cycle are nearly equal in duration; but when we speak, the pattern changes to one of very rapid inhalation and very slow exhalation. (②) The rate at which we breathe also changes. (③) When we are silent and at rest, our average rate is 12 breaths a minute, so the time we take to inhale and exhale is about 2.5 seconds each. (④) This altered pattern of breathing enables our exhalations to 'carry' much larger amounts of speech than would otherwise be the case. (⑤) In everyday conversation, it is perfectly normal to produce 250 to 300 syllables in a minute.

*respiratory: 호흡의 **syllable: 음절

39.

Aerial photos and topographic maps can help identify potential routes of overland flow; field checking, however, is required for verification.

During wet weather, lawns release nitrogen, phosphorus, and pesticide residues, feedlots contribute bacteria, parking lot runoff has oil and antifreeze, construction sites release soil, and industrial facilities may have on hand barrels of hazardous material capable of being swept away in a flood. (①) It is important to know the locations of the hazardous substances and their relationship to the temporary drainage network capable of transporting their releases. (②) For example, some erosion may reach a catch basin 100 feet away, yet in other cases the eroded material will never make it to a storm drain because it reaches a natural depression first. (③) In addition, dye testing is often used to help identify inflow of precipitation into sewers and to reveal the paths of stormwater and wastewater. (④) During this process, non-toxic dyed water is introduced into roof drain leaders, driveway drains, or area drains. (⑤) In some instances, dyed water is injected into the ground around foundations to check for the illegal connection of foundation drains. [3점]

*topographic: 지형의 **phosphorus: (화학) 인 ***precipitation: 강우

40. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

In science, we use different models to describe nature; we have different ways of building up our scientific knowledge, and we regularly create different narratives depending on what aspects of a phenomenon or process we want to understand, but this is not the same as saying that there are alternative truths about the world. A physicist tries to uncover ultimate truths about how the world *is*. Such truths exist independently of human feelings and biases. Gaining scientific knowledge is not easy, but acknowledging that there *is* a truth out there makes our mission clearer. Following the scientific method, testing our theories and repeating our observations and experiments, ensures that we can get closer to that truth. Even in our messy everyday world, we can still adopt a scientific attitude to reach the truth of a matter. We must therefore learn to spot and weed out what are ideologically motivated truths and examine them rationally. And we must remember that those who advocate 'alternative facts' are not trying to present a believable narrative to replace an original fact, but merely to create plausible levels of doubt to suit their ideologies.

Despite the variety of ways and narratives, there is no _____ (A) _____ that absolute scientific truths exist in the world, and thus the scientist must focus on exploring these truths after _____ (B) _____ ideologically motivated ones from them.

- | | | | |
|--------------|------------------|-------------|-------------------|
| (A) | (B) | (A) | (B) |

[41~42] 다음 글을 읽고, 물음에 답하시오.

The aim of translation is to provide semantic equivalence between source and target language. This is what makes translation different from other kinds of linguistic activity, such as adapting, summarising, and abstracting. However, there are many problems hidden within this apparently simple statement, all to do with what standards of equivalence should be expected and accepted. Exact equivalence is of course (a) impossible: No translator could provide a translation that was a perfect parallel to the source text, in such respects as rhythm, wordplay, and cultural things. Such a parallel is not even possible when paraphrasing within a single language: There is always some (b) loss of information.

On the other hand, there are many kinds of inexact equivalence, any of which can be successful at a certain level of practical functioning. It therefore follows that there is no such thing as a 'best' translation. The success of a translation depends on the (c) accuracy for which it was made, which in turn reflects the needs of the people for whom it was made. An inelegant, rough-and-ready translation of a letter can suffice to inform a firm of the nature of an enquiry. A translation of a scientific article requires careful attention to meaning, but little attention to aesthetic form. The provision of a dubbed film script will warrant painstaking care over the synchronization of lip movements, often at the expense of (d) content. Literary work requires a sensitive consideration of form as well as content, and may prompt several translations, each of which (e) emphasizes a different aspect of the original. It is easy to see that what might be 'best' for one set of circumstances may be entirely unsuitable for another.

*semantic: 의미(상)의 **synchronization: (영화의) 화면과 음향의 일치

[43~45] 다음 글을 읽고, 물음에 답하시오.

(A)

Ethan and Ryan had been close friends since childhood, brought together by their shared passion for music. Ethan played the piano, while Ryan played the guitar, and they played in their high school band, which strengthened their friendship. However, after Ryan entered a university in another region, they had fewer chances to play music together. One day, Ethan heard about a famous music contest in the city. Thinking it would be great to enter with Ryan, Ethan called (a) him and asked, "How about we join the music contest together?"

(B)

As they began performing, the harmony of piano and guitar filled the hall. When the performance ended, the audience responded with enthusiastic applause. They didn't win any prize, but neither of them felt disappointed. "(b) I think that what really matters is that we did it together," Ryan said. Ethan smiled and added, "Yeah. Just being able to play together again means everything." That night, the two returned home with excited hearts, dreaming of the next time they would perform on stage again.

(C)

They practiced every day, and the contest was just one day away. "I can't believe the contest is already tomorrow. Time flew by so fast," Ryan said. Ethan nodded and said, "Yeah. It wasn't long ago that (c) you were still struggling to get used to the guitar." After finishing their last practice, they relaxed by talking about old times. Finally, the contest day arrived, and their turn came quickly. Ryan checked his watch while Ethan took a deep breath backstage. "It's our turn. Whatever the result may be, we've done our best," Ethan said. Ryan nodded and said, "Yeah, let's enjoy this moment."

(D)

At first, Ryan hesitated about Ethan's suggestion, but he eventually agreed. After entering university, Ethan kept taking piano lessons and steadily practiced piano, but Ryan hadn't played the guitar in a long time. "I'm not sure I can do well," (d) he said in a worried voice. Ethan reassured him, saying, "Don't worry, Ryan. You picked it up quickly the first time too." They started practicing, and Ryan soon got used to playing the guitar. "Playing music with (e) you makes me feel like we're back in high school," Ryan said.

43. 주어진 글 (A)에 이어질 내용을 순서에 맞게 배열한 것으로 가장 적절한 것은?

- ① (B) - (D) - (C) ② (C) - (B) - (D)

1번부터 17번까지는 듣고 답하는 문제입니다. 1번부터 15번까지는 한 번만 들려주고, 16번부터 17번까지는 두 번 들려줍니다. 방송을 잘 듣고 답을 하시기 바랍니다.

1. 다음을 듣고, 여자가 하는 말의 목적으로 가장 적절한 것을 고르시오.

- ① 축제 자원봉사자에게 감사하려고
- ② 반려동물 입장 금지 규정을 알려려고
- ③ 지역 여름 축제 진행자를 소개하려고
- ④ 반려동물 축제 행사 일정을 공지하려고
- ⑤ 반려견 동반 시 준수 사항을 안내하려고

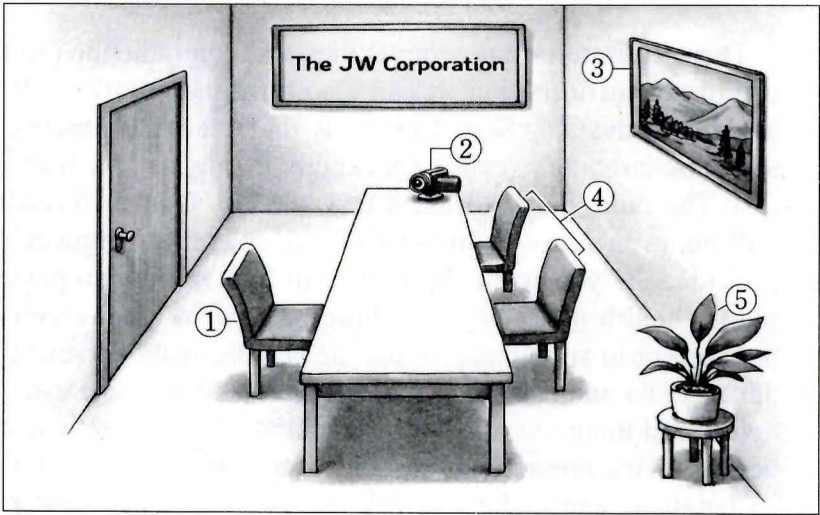

2. 대화를 듣고, 여자의 의견으로 가장 적절한 것을 고르시오.

- ① 환경보호를 위해 선물 포장지 사용을 줄여야 한다.
- ② 선물을 줄 때는 정성껏 포장해 주는 게 바람직하다.
- ③ 선물을 할 때는 상대방의 취향을 맞추는 게 필요하다.
- ④ 선물을 받으면 바로 열어보고 기쁨을 표시하는 게 좋다.
- ⑤ 지나치게 비싼 선물은 받는 사람에게 부담을 줄 수 있다.

3. 다음을 듣고, 여자가 하는 말의 요지로 가장 적절한 것을 고르시오.

- ① 많은 정성은 들여야 깊은 우정이 짝트게 된다.
- ② 사고 모임은 폭넓은 인간관계 형성에 필요하다.
- ③ 친한 친구도 처음에는 그저 아는 사이에서 시작하게 된다.
- ④ 친구를 깊이 사귀는 것과 폭넓게 사귀는 것이 다 필요하다.
- ⑤ 폭넓게 친구를 사귀기보다는 깊게 사귀는 것이 더 중요하다.

4. 대화를 듣고, 그림에서 대화의 내용과 일치하지 않는 것을 고르시오.

5. 대화를 듣고, 여자가 할 일로 가장 적절한 것을 고르시오.

- ① 캠핑장 예약하기
- ② 자동차 점검하기
- ③ 텐트 빌리기
- ④ 식료품 구매하기
- ⑤ 낚싯대 차에 넣기

6. 대화를 듣고, 남자가 지불할 금액을 고르시오.

- ① \$80
- ② \$90
- ③ \$100
- ④ \$110
- ⑤ \$120

7. 대화를 듣고, 남자가 Neon Vibe Live에 가지 못한 이유를 고르시오.

- ① 부모님이 반대해서
- ② 티켓 예매에 실패해서
- ③ 티켓 값이 너무 비싸서
- ④ 아르바이트를 해야 해서
- ⑤ 기말고사 기간이라서

8. 대화를 듣고, Alice in Wonderland 파티에 관해 언급되지 않은 것을 고르시오.

- ① 초대 인원수
- ② 일자
- ③ 준비 비용
- ④ 드레스 코드
- ⑤ 장소

9. Lumina Photo Contest에 관한 다음 내용을 듣고, 일치하지 않는 것을 고르시오.

- ① 18세 이상이 참가할 수 있다.
- ② 2026년 1월 1일 또는 그 이후에 촬영한 사진이어야 한다.
- ③ 올해의 주제는 ‘빛과 그림자’이다.
- ④ 수상자는 상금과 전시 기회를 얻는다.
- ⑤ 저작권은 대회 주최 측이 보유한다.

10. 다음 표를 보면서 대화를 듣고, 두 사람이 예약할 여행상품을 고르시오.

One-Day Guided Tours in Rome

	Tour	Day	Departure Time	Price (Per Person)	Lunch Included
①	A	Thursday	10 A.M.	\$ 90	No
②	B	Friday	8 A.M.	\$ 160	Yes
③	C	Wednesday	9 A.M.	\$ 110	No
④	D	Saturday	7 A.M.	\$ 170	No
⑤	E	Friday	9 A.M.	\$ 120	Yes

11. 대화를 듣고, 남자의 마지막 말에 대한 여자의 응답으로 가장 적절한 것을 고르시오. [3점]

- ① Sure. I'll set it aside for you if you come back soon.
- ② That's too tight. I hope you can extend the deadline.
- ③ It's so kind of you! I can give you an extra discount.
- ④ No, thanks. It takes me an hour to get here, actually.
- ⑤ Okay. I'll pay for it, and you can pay me back later.

12. 대화를 듣고, 여자의 마지막 말에 대한 남자의 응답으로 가장 적절한 것을 고르시오.

- ① I'm a bit busy right now. I'll call you later.
- ② Not at all. It'll take less than 10 minutes.
- ③ Yes. I'm planning to go there tomorrow.
- ④ No. I don't think I can make it today.
- ⑤ I don't know. It's entirely up to you.

13. 대화를 듣고, 남자의 마지막 말에 대한 여자의 응답으로 가장 적절한 것을 고르시오.

Woman: _____

- ① That sounds perfect! I'll look for places in your area.
- ② Thanks for your help! I really love this place.
- ③ I agree! I promise I'll move in tomorrow.
- ④ Congratulations! I've heard it's a great company.
- ⑤ Absolutely! It's best not to drive when going downtown.

14. 대화를 듣고, 여자의 마지막 말에 대한 남자의 응답으로 가장 적절한 것을 고르시오. [3점]

Man: _____

- ① Good for you! I'm really proud of you.
- ② Trust me. You're more capable than you think.
- ③ Try to relax. Staying calm is key in job interviews.
- ④ I'm disappointed in you. Complaining won't help you.
- ⑤ Sure thing. I think you should set your priorities first.

15. 다음 상황 설명을 듣고, Clark 선생님이 Gabriel에게 할 말로 가장 적절한 것을 고르시오. [3점]

Ms. Clark: _____

- ① I hope the team you coach wins the tournament.
- ② I'm sorry, but I'm too busy right now to help you.
- ③ No matter what, you must submit it by next Monday.
- ④ If I allow that, it wouldn't be fair to the rest of the class.
- ⑤ If you need any help, I can lend you some of my materials.

[16~17] 다음을 듣고, 물음에 답하십시오.

16. 남자가 하는 말의 주제로 가장 적절한 것은?

- ① the necessity of storytelling in children's learning
- ② the importance of choosing the right bedtime story
- ③ developmental benefits of bedtime stories for children
- ④ ways to encourage imagination and creativity in children
- ⑤ how to build the parent-child bond through bedtime stories

17. 언급된 이야기가 아닌 것은?

- ① Peter Pan ② Cinderella ③ Rapunzel
- ④ Aladin ⑤ Goodnight Moon

이제 듣기 문제가 끝났습니다. 18번부터는 문제지의 지시에 따라 답을 하시기 바랍니다.

18. 다음 글의 목적으로 가장 적절한 것은?

Dear Residents,

Hello, everyone! I'm Malcolm Chavez from the local Traffic Management Team. To reduce traffic congestion and improve bus services, we would like to inform you of a change in bus stop locations. Bus stop No. 7 will be moved approximately 50 meters from its current location, while existing bus routes will remain the same. The new location will be clearly marked with signs to help you find it easily. We understand this change may cause some temporary confusion, but we appreciate your understanding as we work to provide better transportation services for our community. Thank you for your cooperation.

Sincerely,
Malcolm Chavez

- ① 버스 요금이 인상됨을 안내하려고
- ② 대중교통 이용의 중요성을 알리려고
- ③ 버스정류장 위치 변경을 공지하려고
- ④ 지역 교통에 대한 의견을 요청하려고
- ⑤ 교통안전 수칙을 지킬 것을 당부하려고

19. 다음 글에 드러난 Emma의 심경 변화로 가장 적절한 것은?

Emma went to a museum with her parents on Sunday afternoon. She yawned as she looked at the exhibits, glancing around without much interest. Nothing in the museum seemed to catch her attention, and she found herself drifting from one display to another. Then, a bright sign on the wall suddenly drew her eyes: "Ancient Maze: Dare to find your way out!" Emma decided to give it a try. The adventure of exploring the maze turned out to be much more thrilling than she had expected. When she finally found the exit, Emma let out a joyful cheer. She ran to her parents and said, "I want to try the maze again next time!" with a bright smile.

- ① bored → excited ② hopeful → lonely
- ③ pleased → indifferent ④ surprised → disappointed
- ⑤ anxious → relieved

20. 다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

There are interesting complexities and contradictions to the use of scientific jargon. It can also turn people off. A 2020 study from the Ohio State University found that the presence of scientific jargon can cause nonexperts to engage less with the text. The more jargon-dense a text, the less interested readers will be, even if lay definitions for the scientific language are provided. If you want the public to buy into an important public health message or embrace a new cancer screening program or to simply appreciate the significance of a scientific advance, an audience that is disengaged and less interested is a very bad thing. As a result of this kind of research, there has been growing pressure on the scientific community to simplify its language and make its work more readable and relatable. Biomedical journals now often include lay summaries of major studies and easily understandable infographics that can be shared on social media. All sensible and commendable.

*jargon: 은어, 특수 용어 **lay: 전문 지식이 없는

- ① 대중이 과학에 흥미를 갖도록 하려면 전문 용어 사용을 줄여야 한다.
- ② 독자들의 호기심을 자극하기 위해 학문적인 표현을 사용해야 한다.
- ③ 과학 교육 활동에서 시청각 자료를 적극적으로 활용해야 한다.
- ④ 과학적 글은 대중이 아니라 연구자의 관점에서 작성되어야 한다.
- ⑤ 과학 정보를 효과적으로 전달하기 위해 전문가 권위에 의존해야 한다.

21. 밑줄 친 we are pouring our power on faster and faster이
다음 글에서 의미하는 바로 가장 적절한 것은? [3점]

The term ‘Anthropocene’ is used to mean the era in which human influence is the dominant source of change to the ecosystem. Our arrival in this Anthropocene has been like a pH titration experiment. In the lab, acid might be dripped into a flask of alkali solution. For ages there is no colour change at all because the alkali still dominates, then suddenly, one more drip and the balance shifts. The flask turns acidic, the indicator turns from blue to red and the world inside the flask becomes an entirely different place. In our global experiment, we have been adding more and more human power into the mix but for millennia the planet’s restorative power still dominated. Although we wiped out some other species, we have broadly got away with treating the world as a big sturdy playground. Suddenly it is fragile. The playground will break unless we dramatically change the way we play in it. And this particular titration experiment has also been a crazy one because whereas in the science lab the closer you think you are to the balance point the more slowly you add the acid, we are pouring our power on faster and faster.

*Anthropocene: 인류세(人類世) **titration: (화학) 적정(滴定)

- ① we are rapidly upsetting the global environmental stability
- ② we are depleting our natural resources at an astonishing pace
- ③ we are closely monitoring even the subtlest environmental changes
- ④ our eco-friendly technologies are advancing at an unprecedented rate
- ⑤ our costs to address environmental degradation are increasing rapidly

22. 다음 글의 요지로 가장 적절한 것은?

Architects rarely invent anything completely new, since most of what exists today is rooted in history. Architects who study precedents can avoid unnecessary failures by employing solutions that have been tested over time. For example, the failure of the Pruitt-Igoe housing project in St. Louis, Missouri, served as a warning for urban planners and architects. It resulted in a shift in recent years away from the rational, isolated tower-in-the-park planning model to more mixed-use, diverse, and human-scale neighborhoods. Undeniably, more suitable historical precedents, such as Italian towns, have influenced the contemporary city, and have led to the use of such aspects as walkability and sociability which transcend time and place. Accumulated knowledge enables architects to build on previous successes. Similarly, the scientist Isaac Newton’s famous phrase references the evolution of knowledge: “If I have seen further, it is by standing on the shoulders of giants.” Architects, inspired by precedents, can create synergy.

*precedent: 선례

- ① 세상에 존재하는 모든 것은 역사에 뿌리를 두고 있다.
- ② 건축가는 새로운 것을 만들어 내는 존재이다.
- ③ 건축가들은 과거에서 영감을 받아 결과물을 만들어낸다.
- ④ 건축가의 작업은 과거의 역사 문서를 분석하고 활용하는 것이다.
- ⑤ 건축학의 진화는 과거를 벗어나는 것에 의해 가능해진다.

23. 다음 글의 주제로 가장 적절한 것은?

One evolutionary approach to understanding personality posits that different levels of personality traits might be more or less adaptive in different environmental conditions. Consider the trait of neuroticism — a tendency toward anxiety and a low threshold for detecting threats. Relatively high levels of this trait might aid survival in dangerous environments. Indeed, being anxious and cautious might have prevented ancestors of modern humans from being injured or killed by predators. However, there are also physiological costs to being on high alert for much of the time. Humans who are chronically anxious might be more susceptible to illness and miss out on important opportunities for doing the kinds of things that also matter for evolutionary success, like reproducing. Such people might not be fun to be around or make for especially good romantic partners. The point is that there are trade-offs associated with high or low levels of all traits, and these trade-offs may depend on the environment in which a person lives.

*posit: 가정하다 **threshold: 임계점

- ① development of various personality traits through evolution
- ② personality traits’ conflicting adaptability in varied contexts
- ③ close link between emotional stability and disease prevention
- ④ human personality traits that have been essential to survival
- ⑤ effects of excessive personality traits on human relationships

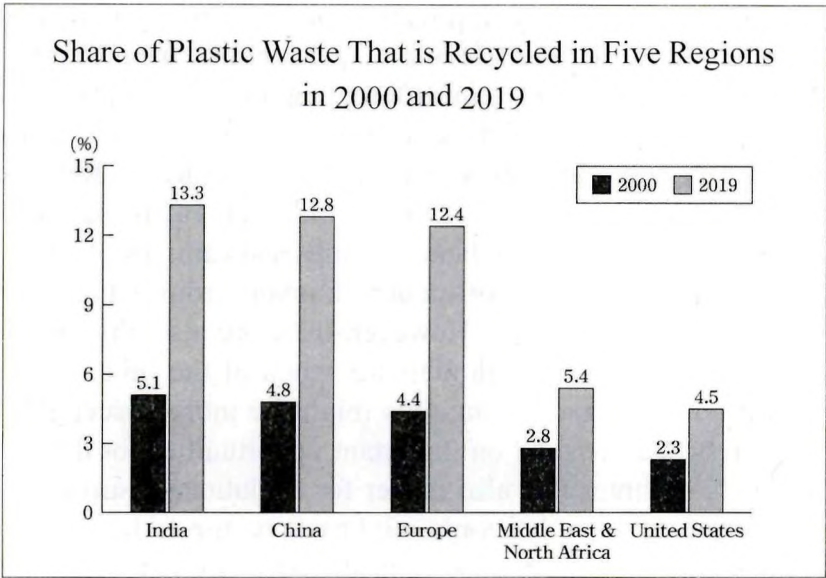

24. 다음 글의 제목으로 가장 적절한 것은? [3점]

If we cannot control or manage the flow of information on the Internet, the next best thing is to control our own online informational behavior. That is within our control. We have to learn how to use and disseminate information wisely, in a manner that protects and promotes our individual and collective well-being. Wisdom that was the core concern of philosophy in ancient Greece and Rome — think of Plato, Socrates, Aristotle, Seneca, Cicero, and so on — provides a ready-made model. As a higher-type of knowledge (knowing how to understand and use information upon reflection and with good judgment for the benefit of oneself and society), wisdom can provide practical “know-how” for applying information to improve our lives and that of others. It is also a *reflective virtue* in the form of practical prudence, which can teach us how to create and use information to live good and meaningful lives in the infosphere — lives that are capable of leading to self-fulfillment and happiness for us and others.

*disseminate: 전파하다 **prudence: 신중함

- ① Enriching Lives: Philosophy’s Universal Guidance
- ② Reflection: Shortcut to Keeping Our Mind Healthy
- ③ Classics’ Significance Amid the Flood of Digital Media
- ④ Digital Information Thoroughly Transforming Our Lives
- ⑤ Cultivating Digital Wisdom to Nourish Well-Being for All

25. 다음 도표의 내용과 일치하지 않는 것은?

The graph above shows the share of plastic waste that is recycled in five regions in 2000 and 2019. ① Each of the five regions in the graph had a larger share of recycled plastic waste in 2019 than in 2000. ② India's share of recycled plastic waste was 5.1% in 2000, and it was more than twice that in 2019. ③ Among the regions above, China ranked in second place in the share of recycled plastic waste in 2000 and remained in second place in 2019. ④ The share of recycled plastic waste was lower in the United States than in the Middle East and North Africa in 2000, whereas the reverse was true in 2019. ⑤ The gap in the share of recycled plastic waste in Europe in 2000 and 2019 was 8 percentage points, which was the same as that in China.

26. Archibald Low에 관한 다음 글의 내용과 일치하지 않는 것은?

Archibald Low was an English consulting engineer and inventor born in London. He developed an interest in mechanics and science from an early age, visiting his father's workplace. Under the guidance of his mentor, Professor Ashcroft, he entered Central Technical College at the age of 16, where he explored various scientific fields. He then joined Low Accessories and Ignition Company, an engineering firm run by his uncle. During this period, he continued to come up with new ideas, one of which, the forced induction engine, was exhibited at the Olympia Motor Cycle Show. In 1914, he gave his first demonstration of a device called the TeleVista, but the outbreak of World War I prevented him from continuing his research on the device. He soon enlisted in the army and was assigned to the Royal Flying Corps. He was honored in the International Space Hall of Fame in 1976.

- ① 어린 시절부터 기계와 과학에 관심을 가졌다.
- ② Ashcroft 교수의 지도를 받았다.
- ③ 삼촌이 운영하는 기술 회사에 다녔다.
- ④ 제1차 세계 대전 당시 TeleVista를 연구했다.
- ⑤ 1976년에 국제 우주 명예의 전당에 올랐다.

27. 2026 Hope Run Marathon에 관한 다음 안내문의 내용과 일치하지 않는 것은?

2026 Hope Run Marathon

Join us for the Hope Run Marathon along the Clearstone River in Elmsford City to support our community! For every 1km completed, \$20 will be donated.

When: June 11th, 8 a.m.

Course Options

A	B
5km Run (for beginner runners)	10km Run (for experienced runners)

How to Apply

- Sign up at www.hoperuncharity.org by May 31st.
- Team registration is available for groups of 5 or more.

Notes

- Visit our website to view the course map and more details.
- Water stations will be available along the course.
- ※ All participants will receive a special edition T-shirt.

- ① 1km를 완주할 때마다 20달러가 기부된다.
- ② 두 가지 길이의 코스가 있다.
- ③ 5인 이상 단체 등록이 가능하다.
- ④ 웹사이트에서 코스 지도를 확인할 수 있다.
- ⑤ 특별판 티셔츠는 완주자에게만 제공된다.

28. 2026 Highland Short Film Contest에 관한 다음 안내문의 내용과 일치하는 것은?

2026 Highland Short Film Contest

Do you have a story to tell through film? We invite original short films from anyone with a passion for storytelling and visual expression.

Guidelines

- All topics and genres are welcome.
- Film length must be three to ten minutes.
- Participation is limited to individuals only (no team entries).

Submission Details

- Submissions will be accepted from April 8th to April 10th.
- The original film must be submitted through our website (www.highlandfilmfest.com).
- Each participant is allowed to submit only one film.

Additional Information

- Winning films will be screened at the Highland Cultural Center.
- The winners will be selected by film professionals.

- ① 영화의 주제가 정해져 있다.
- ② 팀으로 참가할 수 있다.
- ③ 일주일 동안 접수할 예정이다.
- ④ 각 참가자는 한 편의 영화만 제출해야 한다.
- ⑤ 수상작은 공식 홈페이지에 게시된다.

29. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

Causality normally is understood as a link of cause and effect in time. It postulates not only an ‘after’, but a ‘therefore’: phenomena can be traced to their reasons. Hence, if a certain combination of causes ① occurs, a certain result can be observed — or at least there is a probability for this cause-effect linkage. Complexity is defined as a state ② where more linkages exist than we (normally) can describe or analyze. Complex systems are characterized by unstable input-output relationships, system boundaries ③ changing over time, and a system behavior that is not dependent on the past. In this situation, we, as observers and decision makers, are forced to select important and not so important causes and effects, and have to decide when to stop searching for further linkages. ④ Given there is no absolute rule to decide upon selection and termination, different observers will end up with different cause-effect explanations and dissenting forecasts for the same observation. Any one best way ⑤ redefines to one best way for each given situation and one best way for each given person.

30. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Variability in judgments is expected and welcomed in a competitive situation in which the best judgments will be rewarded. When several companies (or several teams in the same organization) compete to generate innovative solutions to the same customer problem, we don’t want them to focus on the ① same approach. This also applies to when multiple teams of researchers attack a scientific problem, such as the development of a vaccine: We very much want them to look at it from ② different angles. Even forecasters sometimes behave like competitive players. The analyst who correctly calls a recession that no one else has anticipated is sure to gain fame, whereas the one who never strays from the ③ disagreement remains unknown. In such settings, variability in ideas and judgments is again ④ welcomed, because variety is only the first step. In a second phase, the results of these judgments will be pitted against one another, and the best will triumph. In a market as in nature, selection cannot work without ⑤ variation.

*recession: 경기침체 **stray: 벗어나다 ***pit: 맞붙게 하다

[31~34] 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

31. Women’s dresses from the eighteenth century offered a great opportunity for repurposing, as they were frequently fashioned from long, uncut lengths of fabric. Textiles were significantly more costly than the labor it took to alter them, and as a result, most garments were modified numerous times to keep up with changes in fashion. “Even the wealthy saved fabrics, remodeled clothes, and sold unwanted items in the secondhand market,” observes fashion scholar Linda Walters. “Sustainability was a way of life.” Indeed, although change is inherent to fashion, the remodeling of the existing clothing, rather than buying new, was a widespread practice. It is rare, in fact, to find an eighteenth-century dress that does not show some sign of _____. The cost of having a gown made, or remade, was only about half the cost of the textile itself and could be significantly less, depending on the type of fabric. In addition to updated dress silhouettes, accessories and trimmings played an important role in refreshing old clothing styles.

- ① alteration ② enthusiasm ③ originality
④ achievement ⑤ degradation

32. Many experiments show the importance of flexibility. Children, from an early age, learn preferentially from parents in some domains, from experts in other domains, and finally they choose to copy their peers for others, such as the preference for certain toys. In a series of four lab experiments, Tom Morgan and colleagues find that adult participants were sensitive, among other factors, to the number of demonstrators (copy the majority), to their own confidence on how good they were in the task (copy when uncertain), to the cost of errors when using individual learning (copy when asocial learning is costly), or to the actual performance of the demonstrators (copy successful individuals). Even chimpanzees, when they can access different rewards, easily _____. A chimp used to give a white cup to receive a peanut will not switch its behavior to follow a majority that receive the same peanut, only by exchanging it for a brown stick. The same chimp, however, will promptly switch when proposed a new peanut-exchanging machine, one that gives five, instead of one, peanuts back. [3점]

*asocial: 비사회적인

- ① adjust their learning strategy
② display their status in a society
③ resist the practices of their group
④ change the situation in their favor
⑤ imitate the most influential member

33. One of the difficulties with sticking to your own principles is that it will sometimes require you to criticize people who are on your side. And whenever you dare to point out that some of the people who are usually on your team may have gotten the wrong end of some important stick, you are likely to be accused of committing the sin of looking for equal fault with “both sides.” But if those who see themselves as being on the right side of history avoid criticizing members of their own team for fear of being seen to downplay the sins of the other side, it will become impossible for them to hold the worst instincts of their own group in check. In this way, the charge of both-siderism raises the cost for internal critique, allowing the most immoral and cynical members of each coalition to go unchallenged. That is why you should _____ even when you believe the sins committed by your side to be far less grave than those committed by your political adversaries.

*coalition: 연합(체)

- ① resist inner desires to commit sins
- ② remain willing to criticize your own
- ③ avoid finding faults of other groups
- ④ adhere to your principles at all costs
- ⑤ foster team harmony without self-analysis

34. Paths form naturally where animals and people walk. On the side of a hill, the climbing path is snakelike, which is why it is called serpentine (from serpens for snake in Latin). It is a zigzag trail, where each segment is a grade (angle of climb) considerably smaller than the angle of the shortest path to the top of the hill. Going straight up is the difficult way, like lifting the stones step by step on the pyramid. Moving along the inclined segment is the easier way; yet, this way is also laborious when the angle of climb is small and, as a consequence, every segment of the zigzag is long, and many segments are necessary to reach the hilltop. The serpentine path itself, the number of turns and the length of each segment, emerges naturally from the _____. Like the shape of the pyramid, the serpentine path is the “shape” of the balance between difficult and easy, and between fast and slow. [3점]

*serpentine: 뱀 모양의, 구불구불한
 grade: 경사도 *laborious: 힘든

- ① set of the weathering processes that shape the landscape
- ② wisdom of the people who appreciate the shortcut
- ③ survival behavior of animals to avoid predators
- ④ animal urge to have easier access to the top
- ⑤ engineering instinct of the mountain people

35. 다음 글에서 전체 흐름과 관계 없는 문장은?

The accessibility of (public) transport is a major factor in shaping the everyday lives of, independence of, and opportunities for people with disabilities and older people. ① Importantly, the quality of access that people have to transport is related not only to their impairment, but also to other aspects of identity such as gender, age, income, and where they live. ② Studies have provided evidence of the disabling design and operation of the transport infrastructure, including at stations, on buses, travel information, and the support from staff. ③ Moreover, among the significant number of people with disabilities who are migrants, there is evidence that many of them are being denied access to healthcare. ④ Terms such as ‘transport-based social exclusion’ have been devised to highlight the barriers that many people with disabilities face, and the resulting loss of independence. ⑤ The study in Poland described how people with disabilities made fewer, shorter, journeys than did people without disabilities within the city area (to leisure activities); their behavior was determined in part by their income, activities that people wished to participate in, and where those activities took place.

36.

Symbolic anthropologists try to understand a culture by discovering and analyzing the symbols that are most important to its members.

- (A) However, Turner argues that this complex symbolism helps hold Ndembu society together by reaffirming its central principles. For anthropologists, to understand the meaning of the mudyi tree and the role it plays in Ndembu society is to have penetrated deeply into the Ndembu view of the world.
- (B) These often reflect the deep concerns that are difficult for culture members to articulate. For example, according to Victor Turner, among the Ndembu of East Africa, the mudyi tree is a central symbol and plays an important role in girls’ puberty rites.
- (C) The tree has a white, milky sap that symbolizes breast-feeding, the relationship between mother and child, the inheritance through the mother’s family line, and, at the most abstract level, the unity and continuity of Ndembu society itself. It is unlikely that all Ndembu think deeply about all of these meanings during the puberty rites of their girls.

*penetrate: 꿰뚫어 보다 **puberty: 사춘기 ***sap: 수액(樹液)

- ① (A) - (C) - (B) ② (B) - (A) - (C)
- ③ (B) - (C) - (A) ④ (C) - (A) - (B)
- ⑤ (C) - (B) - (A)

37.

The *opportunistic market* occurs as the television season progresses. Although most of the networks' inventory is purchased during the upfront markets, some time might become available closer to airdate.

- (A) For example, a salesperson with extra inventory might offer a low-cost spot to a particular buyer who has been an excellent customer. Or a buyer may purchase a spot to help the seller out because the salesperson has given him preferential treatment in the past.
- (B) Perhaps deals negotiated early in the season fell through as a result of cuts in an advertiser's budget or the implementation of new marketing strategies. Or perhaps changes in network lineups, such as the cancellation or rescheduling of a program or the addition of a special event, resulted in extra inventory.
- (C) These changes would relieve advertisers of their commitments, and create opportunities for the last-minute purchase of airtime. The circumstances might favor the network; or they might give the advantage to an advertiser. Buyers and sellers often use such opportunities to settle debts from past business deals. [3점]

*upfront market: 선지급 거래 **lineup: (방송) 예정표

- ① (A) - (C) - (B) ② (B) - (A) - (C)
- ③ (B) - (C) - (A) ④ (C) - (A) - (B)
- ⑤ (C) - (B) - (A)

38.

On the other hand, if our eating habits follow our food preferences with enthusiasm, we cannot blame these preferences if we do not use up the energy that they encourage us to consume.

The sensory pleasure that has motivated us to consume high-energy foods has given us huge adaptive advantages in our evolutionary past. (①) It is what has kept us alive as a species. (②) The malleability of our preferences in being able to link smells, sights and other sensations to calories has allowed us to respond to changing environments with success. (③) Of course, now we can choose to obtain all the energy we need from easily available 'healthy' low-energy foods if we wish. (④) And this may be an adequate diet if our energy needs are low, perhaps because we engage in little physical activity. (⑤) And, perhaps more to the point, we ought to give thanks to them for providing us with some of life's greatest pleasures.

*malleability: 유연성

39.

Instead, it rests on probabilities and likelihoods, risks and rewards.

Perhaps the first truly successful artificial intelligences were expert systems. These were designed to emulate the thinking of experts in specific domains, such as medical diagnostics. (①) The subject of a great deal of work in the 1970s and 80s, expert systems never really took off for a number of reasons. (②) They were extremely expensive to produce, and (most importantly) they could only emulate reasoning to the extent that it followed strictly definable rules. (③) The great majority of human reasoning isn't rule-based in this strict, deterministic way. (④) All the heuristics and biases that have been identified evolved to help us reason about probability and value. (⑤) Indeed, it's this sort of reasoning that's made humans such a successful species, so it should come as no surprise that the commercial success of AI has resulted from the development of systems capable of learning about probabilities. [3점]

*emulate: 모방하다 **heuristic: 발견적 방법

40. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Why is thinking not much fun? For a start, it requires effort. Human beings are naturally resistant to squandering resources whenever effort is involved. However, do not think of this trait as laziness. Instead, it relates to a careful allocation of personal energies. Effort is a factor that has to be consistent with one's personal motivation and committed goals. Further, it is tied to one's 'self-efficacy' level or confidence that we can succeed. To ask someone to invest effort is never a simple request. It involves a cost that they must consider in relation to other demands being placed upon the mind at the same moment in time. We are resource-limited creatures, but thinking uses up resources remarkably quickly. So to resist an invitation to think is not necessarily an indication of laziness. It could reflect a decision to be economical, cautious, or even prudent with our personal resources.

*squander: 낭비하다

Thinking, which requires a lot of effort and energy, is a demanding activity that needs a (A) with respect to our limited resources, so our (B) to think is not without reason.

- | | | | |
|-----------------|------------------|---------------|-------------------|
| (A) | (B) | (A) | (B) |
| ① self-interest | temptation | ② variation | willingness |
| ③ compromise | reluctance | ④ replacement | willingness |
| ⑤ concentration | reluctance | | |

A new vision of disease has been emerging, telling us some very good news. If you practice lifelong wellness, beginning as early as childhood, the many threats that attack us from middle age onward can be (a) defeated — the secret is to act before any sign of threat appears. This is known as “incremental medicine” — the iceberg of which a single story about dementia is the tip. Take the seemingly strange finding about education. Experts estimate that dementia could be reduced by 8 percent globally if kids stayed in school until they were fifteen, one of the biggest single reductions on the list. The reason why traces a long trail. The more educated you are, the more information your brain stores and the better it (b) accesses what you’ve learned.

This buildup of information, starting in childhood, leads to something neuroscientists have identified as “cognitive reserve,” a boost to the brain in terms of (c) added connections and pathways between neurons. When you have this, the memory loss associated with Alzheimer’s and other forms of dementia is (d) quickened, because the brain has extra paths to follow if some grow weak or diseased. As medical logic goes, long trails are changing everyone’s thinking, because they exist in many if not most diseases. Suddenly it’s not about (e) isolated factors like not smoking, losing weight, going to the gym, and worrying about stress. It’s about a continuous style of living where self-care matters every day in every way.

*incremental: 점진적인 **dementia: 치매

41. 윗글의 제목으로 가장 적절한 것은? [3점]

- ① Building Neurological Assets Early to Pay the Cost of Age
- ② Spoiled Health Underneath the Flood of Health Information
- ③ Roads to Harmony Between Mental and Physical Health
- ④ Proper Health Education Lasting for a Whole Life Span
- ⑤ Activities to Enhance Mental Muscles Against Dementia

42. 밑줄 친 (a)~(e) 중에서 문맥상 낱말의 쓰임이 적절하지 않은 것은?

- ① (a) ② (b) ③ (c) ④ (d) ⑤ (e)

(A)

Liam walked into the community center, unsure of what to expect. His school required him to do volunteer work, so he had signed up to help at the senior center. To be honest, he wasn’t sure if he’d enjoy it. As he entered, an elderly woman smiled at him. “You must be new. I’m Mrs. Carter.” Liam nodded. “Yeah, I’m here to help.” She chuckled and handed him a schedule. “You’ll be reading to Mr. Jenkins today. He used to be a teacher, so (a) he loves a good story.”

(B)

Two days later, Liam brought the book Mr. Jenkins had mentioned. As he read aloud, Mr. Jenkins occasionally shared stories from his youth. Liam found himself laughing at the man’s adventures and admiring (b) his wisdom. As time passed, more seniors gathered around to listen. Liam hadn’t expected how much his visits meant to them and how enjoyable the visits could be. He realized that just being there and listening could make a difference. Before (c) he left, Mr. Jenkins patted his arm. “Thank you, Liam. You have no idea how much your visit means to us.”

(C)

That afternoon, Liam sat across from Mr. Jenkins, a retired teacher. At first, he felt uneasy, not knowing how to start the conversation. Then, as he started reading, Mr. Jenkins listened attentively, occasionally nodding and smiling. When he finished, Mr. Jenkins said, “I taught literature for many years. It’s been a long time since I’ve heard a story like that.” Liam hesitated before asking, “Do (d) you have a favorite book?” The man’s eyes lit up. “Oh, many! Maybe next time, you can bring one.”

(D)

Liam walked out of the community center with his luggage. Mr. Jenkins patted Liam’s shoulder and said, “The members really enjoy your visits. I hope we’ll see you again.” Feeling a sense of fulfillment, Liam said, “I thought I was here to help, but I’ve gained a lot too.” Liam waved back at (e) him and left there, knowing he’d return — not just to complete his hours, but because he truly wanted to. What began as a simple obligation had become something far more meaningful, and he left with a lighter heart.

43. 주어진 글 (A)에 이어질 내용을 순서에 맞게 배열한 것으로 가장 적절한 것은?

- ① (B) - (D) - (C) ② (C) - (B) - (D)
